

TECHNICAL SPECIFICATIONS – CINEMA ADVERTISING 2022

Material Requirements

All broadcast files must follow:

File format: **.mov, mp4** or **.wmv** – H264, Prores, Cineform or uncompressed

Frame rate: **25 fps**

Resolution: **1920x1080**

Scan Type: **Progressive**

Audio level: Leq(M) = **82dB**

You can choose between delivering stereo mix or 5.1 Surround mix. To ensure best sound experience in the Cinemas, 5.1 Surround will of course be preferable.

Stereo: Audio + video must be delivered as a single file - embedded Stereo mix / LtRt

5.1 Surround: Must be delivered as separately named mono .wav audio files, with channel-ID's clearly marked. Video is delivered separately (We don't mind embedded sound in the video, as it will be discarded and replaced by the 5.1 mix)

Channel-ID's: L, R, C, Lfe, Ls, Rs.

We do not accept material delivered with countdown/slate/ident/black/etc. We only need the program-duration itself.

We no longer accept premade DCP files.
